

Sustainable Batteries for the Energy Transition – Join Our Team!

Sustainable batteries as energy storage are key components of the energy transition. We are an experienced and ambitious company that has been at the forefront of developing SaltBatteries. Join us as the Head of Production & Infrastructure in the Energy City of Meiringen in the Bernese Oberland to conquer the market and shape the future of energy sustainably.

We are looking for dedicated talents who share our vision with passion and innovation:

Head of Production & Infrastructure, Member of Leadership Team

Your Skills:

- Degree in Engineering, additional business qualifications advantageous
- Several years of experience in a leadership role, preferably in a manufacturing environment
- Competence in team leadership, motivation, and target setting
- Knowledge in quality management, process optimization
- Experience in budget planning and tracking
- Strong communication skills with local and international stakeholders
- Technology experience in energy storage systems (BESS) or CleanTech is a plus

Your Responsibilities:

- Production planning and setup to support market entry
- Coordination, communication, and collaboration with strategic partners
- Manufacturing process optimization, quality management
- Budget and resource management in production
- Fun at work, Employee/Team-leadership and personnel development
- Certifications according to national and international standards, regulatory implementation
- Customer and supplier management, company representation at partners & conferences
- Project management in battery production and development, knowledge transfer

What We Offer:

Our vision is inspired by nature and innovation. We provide an exciting, forward-thinking work environment with opportunities for personal growth and flexible working hours. Be actively involved in shaping the further development of a cutting-edge, renewable high-performance technology in a unique setting.
